## CORPO COLLECTION

Akrapovič has taken its experience from designing high-end exhaust systems into the apparel world with the launch of its all-new Akrapovič Corpo collection.

It is designed using the traditional Akrapovič colours of black and red, with a subtle graphic on the chest – featuring common element, which is included throughout the collection – providing minimal branding, as used on many of the company's exhausts and carbon-fibre accessories, to create a premium feel for this new corporate clothing line.

The first four items in the collection will hit the shelves in spring and will feature a T-shirt made from cotton elastane fabric for a comfortable fit that is soft to the touch. The zip hoodie is made with double-knit fabric that provides a cosy feel, with a sporty and classy look. Incremental weather is taken care of by a rain jacket with waterproof and breathable layers that is appealing to look at and practical for most conditions. To complement the initial launch of the range, there is a softshell jacket with three layers to keep you warm and protected on cold, windy, and wet days. All these items are available in sizes and cuts for both men and women, and they are made from top-quality materials with the kind of finish you would expect from Akrapovič.

The first four items in the Akrapovič Corpo collection will be joined by more products in this new and exciting range later in the year.
