INFO

This product is inspired by the same design culture as the exhausts used on race-winning superbikes. The lightweight titanium muffler outer sleeve and end cap are sandblasted and coated for increased durability and an attractive appearance. It weighs over 20% (1.4 kg) less than the stock exhaust due to the use of race-inspired materials, and it has a full and deep Akrapovič sound, tuned to the bike's characteristic engine. The exhaust is EC/ECE type approved and Euro 5 compliant. The simple plug and play installation means no remapping is required.
