

Triumph Daytona 660

Product Name: **Evolution Line (Titanium)**

Product code: **S-T6E1-APLT**

Approval: W/O

MSRP ex. VAT: 2.895,00 €

INFO

Developed exclusively for use on competition circuits, this exhaust combines race-proven materials, including high-grade lightweight titanium using various alloys, to optimize each section of the exhaust for performance, weight, and durability. A hand-made carbon-fibre heat shield, a black-coated aluminium muffler bracket, and a coated muffler outer sleeve for enhanced resilience under the most demanding racing conditions complete the system. It is finished using new technology to apply the Akrapovič logo decal, resulting in a higher temperature threshold and increased durability.

A special link pipe collector with a resonator has been developed to achieve optimum performance of this complete exhaust system, and for a perfect fit a header design solution with a grand prix racing pedigree is used. Complex parts, such as exhaust flanges, are cast in the Akrapovič in-house foundry.

Noise measurements carried out by Akrapovič engineers using the FIM method recorded a noise level below the FIM noise limit of 107 dB.

This product also fits stock specifications, and ECU remapping is mandatory.

THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.
