INFO

The Racing Line represents a full step in the exhaust system tuning process and offers a great balance between price and optimum performance. Racing performance exhaust systems are designed for riders that demand maximum performance from their motorcycle. The systems feature exceptional production quality and increased engine performance combined with pure racing sound output. An increment by 1.5 Kw (2.0 HP) and 1.3 Nm was recorded on Akrapovič's in-house dyno with back-to-back tests of the Yamaha with a Racing Line (Titanium) exhaust and a Yamaha MT-09 with a standard stock exhaust system. A combination of racing materials like high-grade titanium for the muffler outer sleeve give these exhaust system a racing touch.

Catalytic converter is included within the system.

Exhaust system is compatible with side cases and central stand.
